**DECLARATION IN SUPPORT OF PETITION UNDER 37 C.F.R. § 1.47(b) BY PERSON
HAVING PROPRIETARY INTEREST TO FILE APPLICATION ON BEHALF OF
INVENTOR WHO WE HAVE BEEN UNABLE TO LOCATE**

Dear Sir:

This Declaration is in support of Petition under 37 C.F.R. § 1.47(b) to allow UTStarcom, Inc. to make the application on behalf of inventor Tae Hong KIM who we have been unable to locate.

1. I, Jiwon LIM, am a paralegal at the law firm Kim & Chang.

2. I have first-hand knowledge of the facts recited herein.

3. This Declaration is in support of U.S. Patent Application entitled "APPARATUS AND METHOD FOR DUALIZING AN ASYNCHRONOUS TRANSFER MODE (ATM) ROUTER IN A CDMA 2000 SYSTEM," filed in the U.S. Patent Office on July 11, 2006 and bearing U.S. Application No. 10/585,602 and International Application No. PCT/KR2005/00134.

4. I am a paralegal at the law firm Kim & Chang, located at Hungkuk Life Insurance Building, 9F, 226 Sinmunno 1-ga, Jongno-gu, Seoul 110-786, Korea.

5. Kim & Chang represents UTStarcom Korea Limited, a subsidiary of UTStarcom, Inc.

6. I am a citizen of Korea, residing at 840-7 Mia-dong, Gangbuk-gu, Seoul 142-820, Republic of Korea.

7. On December 1, 2006 I sent a letter, via content-certified mail, including assignment documents and the Inventor's Declaration of Invention, to Mr. Tae Hong KIM's last known physical address (San 136-1, Ami-ri, Bubal-eub, Icheon-si, Gyeonggi-do 467-860, Republic of Korea). (See attached Exhibit 1).

8. On December 5, 2006, the content-certified package mailed to Mr. KIM was returned because the address was incorrect. (See attached Exhibit 2). I did not attempt to personally visit Mr. KIM's address, as it is the company address of Hyundai Syscomm, Inc.

9. On February 28, 2007, I searched for an e-mail address using the inventor's name and residence identification number in well-known Korean webmail services as well as personal homepage service www.cyworld.co.kr. In order to register for an e-mail address, most of these services require a user to enter his or her full name and residence identification number. These searches resulted in only one complete e-

mail address associated with Mr. KIM's residence identification number.

thkim38@hotmail.com. (See attached Exhibit 3).

10. On February 28, 2007, I sent an e-mail, attaching all U.S. application materials (specification, claims, and drawings) to Mr. KIM's email address, thkim38@hotmail.com. (See attached Exhibit 4). I did not receive a response to this e-mail.

11. I attempted to find Mr. KIM's phone number using Korea Information Services (KOIS). The Korea Information Service Corporation (KOIS) is essentially the Korean version of "411" and other directory assistance services. An English version of the website that describes the services that KOIS provides can be found at www.ekois.co.kr/new/eng/main/index.php. (See also attached Exhibit 5). KOIS is the largest and most comprehensive directory service in Korea. KOIS maintains a large database that is searchable for the contact information of listed people and companies. However, much like "411", written confirmation of results is not provided by KOIS, as it is a telephonic service. Korea Information Services confirmed that no number was registered under Mr. KIM's name and his last known address. All efforts to obtain a current address, phone number, or email address, using KOIS have failed to provide new information concerning the whereabouts of Mr. KIM.

12. On May 15, 2007, I sent a reminder e-mail to Mr. KIM, and also offered U.S. \$250.00 as compensation for his cooperation in prosecuting this application. (See attached Exhibit 6). I did not receive a response to this e-mail.

13. I believe that I have exhausted all means of contacting Mr. KIM.

14. I hereby declare that all statements made herein are of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful

false statements and the like so made under penalty of perjury and that such willful false statements may jeopardize the validity of the specification or any patent issued thereon.

Respectfully submitted,

Date: June 19, 2007

**STATEMENT ESTABLISHING PROPRIETARY INTEREST BY
PERSON SIGNING ON BEHALF OF NONSIGNING INVENTOR
AND STATEMENT UNDER 37 C.F.R. § 3.73(B)**

UTStarcom, Inc. has a sole proprietary interest in the present application. The invention was originally assigned by inventor to Hyundai Syscomm on November 27, 2002, as part of Hyundai Syscomm's employee invention compensation policy, and was filed as Korean National Application Number 2004-0002973 (Exhibit A). On April 27, 2004, UTStarcom, Inc., through its wholly owned subsidiary in Korea, UTStarcom Korea Limited, acquired Hyundai Syscomm's Intellectual Property Portfolio, including the rights to the above-referenced application, corresponding to Korean National Application Number 2004-0002973 (Exhibit B, page 46 of 46, entry number 1319). I establish this proprietary interest

by attaching a copy of the assignment of this invention by the nonsigning inventor to Hyundai Syscomm, Inc. as recorded with the U.S. Patent and Trademark Office, and a copy of the assignment of this invention by Hyundai Syscomm, Inc. to UTStarcom Korea Limited as recorded in the Patent and Trademark Office (Exhibit B). As such, UTStarcom, Inc. is presently the assignee and owner of the rights to the above-referenced application.

This STATEMENT ESTABLISHING PROPRIETARY INTEREST BY PERSON SIGNING ON BEHALF OF NONSIGNING INVENTOR is made by Robert J. Irvine, III, a person authorized to act on behalf assignee UTStarcom, Inc.

Respectfully submitted,

Date: June 20, 2007

Service Types

- ▶ Precise
Phone Number
Search
 - ▶ precision and speed of the KT phone number DB! Phone number search service.
 - ▶ new data updated twice daily based on the nation's largest KT phone number DB.
 - ▶ one click! integrated search service.
- ▶ integrated Search
 - ▶ nice priority information, business name information, business category information, life information numbers (160, 150, 700, public complaints, phone number changes) simultaneous search.
- ▶ precise map
 - ▶ powerful nice 14 map search service

map search service providing 2D/3D maps together with
shortest distance directory assistance.

4. My smart service

- various personal services provided such as schedule management, address book, memo pad, scrap book etc.
- only the essential information collected provision of a community area where members can directly post/obtain essential information arranged in themed categories.

5. A variety of everyday life information services

- zip code search & subway station search (connecting line information)
- weather information service, accommodation search & reservations
- various document forms & legal information, lost children search service
- other contents to be continuously gained and provided

6. Close area search service (our neighborhood selection)

- service providing everyday life information for areas of interest by the user selecting a specific area

7. ServiceInquiry

- Tel : 02-2235 0385
- Make Inquiry (Direct to Inquiry)

[E-mail to the inventor Tae Hong Kim from K&C staff, Jiwon Lim]

From: zjwlim (Ji-Won Lim)
Date: May 15, 2007 8:07 PM
To: thkim38@hotmail.com
Cc: jykim1 (Joo-Young Kim)
Subject: [To. Mr. Tae Hong Kim] An announcement from Law offices of Kim & Chang
Attachment(s): FE251547-THK -SIGNATURE DOCUMENTS.pdf

Dear Mr. Kim,

This is a reminder with regard to the subject case.

As I explained several times before, the right to receive a patent was transferred to UTStarcom Korea Limited. With respect to this invention, a Korean patent application was filed and its counterpart foreign applications were filed by UTStarcom. Unlike other countries such as Europe, China, and Japan, the U.S. Patent law requires documents signed by the inventors. Therefore, if the inventor is uncooperative, the assignee cannot submit the required documents. However, the assignee can substitute the required documents with due diligence documents evidencing the inventor's noncooperation.

Signing of the documents we presented to you results in no loss or no gain to you. It is our understanding that you had assigned your right to your former employer company by signing on the Inventor's Declaration and Assignment. Thus, you are expected to duly cooperate with the right owner or its successor.

For your information, recently we were instructed to pay (currently USD 250) as courtesy disbursement for the inventors assistances in providing signatures.

Please consider the foregoing and let us know via return e-mail whether you wish to cooperate in this matter or not. If you decide to cooperate, please return the signed documents together with the below form. If not, we will incorporate your decision in a due diligence document, which will be filed with the U.S. Patent and Trademark Office.

If you have any other questions, please do not hesitate to contact me.

Law Offices of Kim & Chang

MEMORANDUM OF LAW IN SUPPORT OF PETITION UNDER 37 C.F.R. § 1.47(b) BY PERSON HAVING PROPRIETARY INTEREST TO FILE APPLICATION ON BEHALF OF INVENTOR

This memorandum of law is in support of Petition under 37 C.F.R. § 1.47(b) to allow UTStarcom, Inc. ("UTStarcom") to make the application on behalf of a non-signing inventor.

BACKGROUND

UTStarcom submitted a Petition under 37 C.F.R. § 1.47(b) to allow UTStarcom to make the Application on behalf of the inventor listed in Schedule A, whom UTStarcom has been unable to locate. The Petition was denied on the grounds that UTStarcom allegedly failed to establish a proprietary interest in the above-referenced U.S. Application.

STATEMENT OF FACTS

All facts in support of the argument and conclusion are set forth in the Declaration of Joo-Young Kim under M.P.E.P. 409.03(f).

ARGUMENT AND CONCLUSION

UTStarcom should be awarded title to the above-referenced U.S. Application because UTStarcom, as the assignee of patent rights to the underlying Korean Application and subsequent patent applications granted by the assignor Hyundai Syscomm Inc. ("Hyundai Syscomm"), is the sole proprietary owner of the U.S. Application.

Under Korean Patent Law, UTStarcom is recognized as the owner of the Korean Application. First, the Korean Intellectual Property Office recognizes UTStarcom as the current owner of the Korean Application as a matter of record. Second, the invention disclosure form executed by the inventor in favor of Hyundai Syscomm, which includes an assignment of the subject matter of the Korean Application from the inventor to Hyundai Syscomm, is more than sufficient to overcome any challenge to UTStarcom's ownership interest.

The Korean Patent Act provides that a patent application of an employee may be filed directly by the employee's company, without an explicit assignment from the employee to the employee's company. Korean Patent Act, Article 42. Unless the examiner or a third party contests the company's right to file the application, the company becomes the owner of the application for all intents and purposes. Thus, even in the absence of an employee-inventor assignment, a Korean Patent Application filed by a company without contest by others is the proprietary owner of the patent rights. See Korean Patent Act, Article 42, Para 1.

In the instant case, Hyundai Syscomm filed the Korean National Application , listed in Schedule A, as the named applicant. The filing of the application was not contested by the Examiner or any third party. Thus, under Korean Law, Hyundai Syscomm became the owner of the Korean application even in the absence of an employee inventor assignment. Subsequently, the Hyundai Syscomm's patent portfolio, including the above-mentioned Korean Application, was assigned to UTStarcom. This assignment was recorded with the Korean Intellectual Property Office, without objection, making UTStarcom the legal owner of the above-mentioned Korean Application.

Under the present circumstances, only the inventor(s) may challenge the legitimacy of Hyundai Syscomm's ownership of the

Korean Application. Korean Patent Act, Articles 34 and 35. However, any challenge by the inventor(s) would fail under Korean Patent Law. The inventor(s) executed an invention disclosure form, which assigns the subject matter of the Korean Application to Hyundai Syscomm. Because the subject matter described in the invention disclosure form is virtually identical to the subject matter contained in the Korean Application, the assignment therein would be deemed by a Korean court of law to assign the Korean Application to Hyundai Syscomm. See In-Chul Choi v. Samsung Electronics Co., Ltd., 2001 Gahap 13977 (Seoul District Court, August 22, 2002) (recognizing the validity of the assignment based on the content in the invention disclosure form despite the absence of a specific application number reference). Thus, even if challenged, the chain of title of the Korean Application would be sustained under Korean Patent Law and UTStarcom would remain the ultimate owner.

This ownership of the Korean Application, in conjunction with the other assignment terms of the acquisition agreement previously submitted, establishes UTStarcom's rights to the subsequent PCT application and U.S. national phase application. Thus, UTStarcom has a proprietary interest in the referenced U.S. Application (listed in Schedule A), and should be allowed to make the application in U.S. on behalf of the missing inventor under 37 C.F.R. § 1.47(b).

Respectfully submitted

DECLARATION IN SUPPORT OF PETITION UNDER 37 C.F.R. § 1.47(b) BY
PERSON HAVING PROPRIETARY INTEREST TO FILE APPLICATION ON BEHALF
OF INVENTOR

Dear Sir:

This Declaration is in support of Petition under 37 C.F.R.
§ 1.47(b) to allow UTStarcom, Inc. to make the application on
behalf of the non-signing inventor(s) listed in Schedule A,
column 3, whom we have been unable to locate.

1. I, Joo-Young Kim, am a citizen of Korea, residing at
Sangyong, Apt No. 103-1101, Sungsu-dong 1-ga 16/3, Sungdong-gu,
Seoul, Republic of Korea.

2. I am a Korean patent attorney with the law firm of Kim
& Chang, located at Hungkuk Life Insurance Building, 9F, 226
Sinmunno 1-ga, Jongno-gu, Seoul 110-786, Korea.

3. On behalf of Kim & Chang, I am representing UTStarcom
Korea Limited, a wholly owned subsidiary of UTStarcom, Inc.

4. I am knowledgeable regarding Korean Patent Law.

5. I submit this declaration in support of the
accompanying memorandum of law.

6. The Korean company Hyundai Syscomm filed the Korean
National Application listed in Schedule A, Column 6 as the
applicant of record, with inventor(s) in Schedule A, column 3
listed as the inventor(s).

7. The filing of the above-referenced Korean Application by Hyundai Syscomm was not opposed by the Examiner or any third party including the employee/inventor.

8. On April 27, 2004, UTStarcom, Inc., through its wholly owned subsidiary UTStarcom Korea Limited, acquired Hyundai Syscomm's Intellectual Property Portfolio, including the rights to the Korean National Application listed in Schedule A, column 6, and duly recorded this change of ownership with the Korean Intellectual Property Office without objection.

9. As a result of the acquisition, UTStarcom, Inc. became the sole proprietary owner of Hyundai Syscomm's Intellectual Property Portfolio, which includes the above-referenced Korean National Application.

10. UTStarcom Korea Limited filed the PCT application listed in Schedule A, column 8, claiming priority to the above-referenced Korean National Application.

11. The above-referenced PCT application entered U.S. National phase in the United States on the date listed in Schedule A, column 5, having the U.S. Application Serial Number listed in Schedule A, column 4.

12. I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true, and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the

United States Code and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.

Respectfully submitted,

Seoul Southern District Court**Judgment**

Case No. 2001 Gahap 13977
Plaintiff: In Chul Choi
Defendant: Samsung Electronics Ltd.
Pronouncement: August 22, 2002

ORDER

The confirmation claim of the present action is dismissed.

Tenor of Complaint

Plaintiff hereby seeks confirmation that the patented inventions, described in the patent right list of the accompanying sheet, do not belong to an in-service invention.

GROUNDS**1. Findings of Facts**

A. The Defendant's company, taking fabrication, sale, etc. of communication mechanisms and related devices as its objective under its constitution, has manufactured mobile-phone terminals since May of 1989. The Plaintiff entered the Defendant's company on January 10, 1989, and had served as a member of a team known as the "Time Machine Team (TMT)" between July 13, 1992 and February 16, 1995.

B. TMT of the Defendant's company is a department that was organized by selecting incumbent staff to create ideas for new product development. TMT holds a weekly evaluation meeting, where team members exchange ideas equipped with marketability and practicability, and hold quarterly meetings that report the results to the board of directors, assigning no specific tasks to its team members. The Plaintiff was mainly focused on conceiving and commercializing a new Hangul inputting method, submitting a report titled "Value of Text in the Multimedia World" showing the needs and practicability

[Translation]

of a new Hangul inputting method on May 20, 1994, and a report titled "First report regarding commercialization drive of a new Hangul inputting method" on July 18, 1994, together with his teammate, Dong Ki Rui.

C. During his tenure on TMT, the Plaintiff invented "Method and Apparatus for Generating Text Inputting Codes (hereinafter, referred to as the 'first invention')," described in patent right list 1 of the accompanying sheet, and transferred the right to obtain a patent for the Defendant's company while providing an in-service invention report on the first invention on February 19, 1993. The Defendant's company filed a patent application for the first invention in its name on July 6, 1993, and completed the patent registration on March 13, 1996.

D. Furthermore, the Plaintiff, together with his teammate, Dong Ki Rui, invented "Method and Apparatus for Generating Text Inputting Codes (hereinafter, referred to as the 'second invention')" described in patent right list 2, and transferred the right to obtain a patent for the Defendant's company while providing an in-service invention report on the second invention on October 13, 1994. The Defendant's company filed a patent application for the second invention in its name on May 11, 1995, and completed the patent registration on August 10, 1998.

E. The Defendant's company has manufactured and sold mobile-phone terminals using the text inputting methods of the inventions since November of 1998.

2. The Plaintiff's Claims and Holding thereon

A. Gist of the Plaintiff's Claims

The Plaintiff seeks: (a) confirmation that the first and second inventions are not an in-service invention, arguing that the inventions were misconceived as an in-service invention and filed in the name of the Defendant's company although they actually belong to a liberal invention; and (b) the Defendant's return of 1 billion KrW as part of an unjust enrichment, arguing that since the contracts of transfer were based on a misconception for

[Translation]

the inventions to be an in-service invention are invalid, the Defendant is not a legitimate patentee and has an obligation to return, to the Plaintiff, the profits earned by practicing the inventions as an unjust enrichment.

B. Relevancy of the Confirmation Claim

The Defendant made a defense prior to a main hearing that the Plaintiff's confirmation claim lacks eligibility and thus is irrelevant because it seeks confirmation of a factual matter. The Plaintiff seeks the confirmation for the first and second inventions to not be an in-service invention as a basis for the unjust enrichment return claim being sought by the present action. This is to confirm part of a legal requirement fact, and thus is irrelevant. Furthermore, the confirmation stake of a confirmation action can be recognized if the obtainment of a confirmation judgment is the most effective and appropriate means for eliminating the challenge and risk when the plaintiff's legal status is challenged and risked. However, as will be seen in item C. (1), even though the first and second inventions were not an in-service invention, this would not affect the patent right registered in the name of the Defendant's company, unless the invalidation decision is rendered and becomes final and conclusive in a patent registration invalidation trial. Therefore, because seeking the confirmation for the inventions to not be an in-service invention cannot be seen as an effective and appropriate means, the Plaintiff's confirmation claim of the present action is irrelevant.

C. Unjust Enrichment Return Claim

(1) The Plaintiff argues first, that since the first and second inventions are not an in-service invention but a liberal one, each contract for transferring each right to obtain a patent to the Defendant is invalid per se for primitive impossibility of the objective of a legal activity or under Article 39, Paragraph 1 of the Patent Act, or invalid for violating Article 103 of the Civil Code.

In regard to this, if the first and second inventions belong to a liberal invention, Article 39, Paragraph 1 of the Patent Act stipulates that an invention constitutes an in-service invention if the invention was made by an employee, etc. in connection with his/her service and falls by nature within the business

[Translation]

range of the employer, etc., and the activity resulting into the invention was part of the present or past duties of the employee, etc.

As previously seen, the Defendant's company takes the fabrication and sale of communication mechanisms as one of its founding objectives, and has set the mobile-phone terminal as one of the primary manufactured items from the year of 1989 through to the present time. Since the inventions are directed to a text inputting method usable for mobile-phone terminals, these are regarded to fall within the business range of the Defendant's company. Furthermore, the Plaintiff's then duty was to create ideas for new products development in the field of the information and telecommunication at the time of conceiving each invention, and the Plaintiff reached the first and second inventions substantially as a result of focusing mainly on collecting ideas for a Hangul inputting method. As such, each invention is determined to fall within the Plaintiff's duty.

Therefore, since the first and second inventions should belong to an in-service invention, the Plaintiff's arguments contend the validity of each transfer contact on premise of the opposite.

(2) The Plaintiff also argues that since the patent application for the second invention was filed four months after the Defendant's company succeeded to the right to the invention from the Plaintiff, the second invention should be regarded as a liberal invention under Article 11, Paragraph 1 of the Invention Promotion Act, and the Defendant should return unjust enrichment, amounting to the royalty of a non-exclusive license, for failing to obtain consent to a non-exclusive license from the inventor Plaintiff under Article 2 of the same.

Article 11 of the Invention Promotion Act views an invention as a liberal invention in case an employer, etc. fails to file a patent application within a period designated under the Presidential Order (Article 5 of the same designates the period for four months) after succeeding the right to an in-service invention or waive filing of the application in writing (Paragraph 1), and stipulates that the employer, etc. cannot own a non-exclusive license to the in-service invention being regarded as a liberal one without the consent of the employee, etc in spite of Article 39, Paragraph 1 of the Patent Act (Paragraph

[Translation]

2). The fact that the Defendant's company filed the application for the second invention on May 11, 1995, four months passing from October 13, 1994 when the Defendant's company succeeded to the right to the second invention from the Plaintiff, is as previously seen.

However, even if the Defendant's company had completed the patent registration in its name, although the transfer contract of the second invention was invalidated under the above provision and the Defendant's company did not have a right to obtain a patent, the Plaintiff could not assert invalidity of the patent right having been registered in the name of the Defendant's company until the patent invalidation decision goes final and conclusive. Of course, the Plaintiff could request a patent invalidation trial based on the above grounds, which however, is not feasible here. Therefore, the Defendant has a right to legally practice the invention, and needs not obtain consent of the Plaintiff for practicing the invention because the Plaintiff did not register the patent in his/her own name. As such, the Plaintiff's above arguments are groundless and unreasonable.

판결

사건번호 2001가합13977호
원고 죄인철
피고 삼성전자주식회사
판결선고 2002. 8. 22.

주문

이 사건 소 중 확인청구 부분을 각하한다.

청구취지

원고와 피고 사이에서 별지 특허권목록 기재 1, 2의 특허발명은 직무발명이 아님을 확인한다.

이유

1. 기초사실

가. 피고회사는 통신기계기구 및 관련기구와 그 부품의 제작, 판매 등을 그 정관상의 목적으로 하고, 1989. 5.경부터 이동전화단말기를 생산해 온 회사이고, 원고는 1989. 1. 10. 피고회사에 입사하여 1992. 7. 13.부터 1995. 2. 16.까지 사이에 피고회사의 '타임머커팀'에 소속되어 근무하였다.

나. 피고회사의 '타임머커팀'은 신상품개발을 위한 아이디어 창출을 위하여 사내공모를 통해 직원을 선발, 조직한 부서로 그 팀원들은 구체적인 특정 업무를 맡지 아니한 채 매주 팀원들간에 시장성과 실현성 있는 아이디어를 제출하는 평가회를 가지고, 분기별로 경영진을 대상으로 그 결과들을 발표하는 정기 보고회를 개최하였는데, 원고는 같은 팀원인 류동기와 함께 1994. 5. 20. 새로운 한글입력방식의 필요성과 실용화 방안에 관한 '멀티미디어 세계에서 문자의 가치'라는 보고서를, 1994. 7. 18. '새로운 한글입력방법 사업화추진 1차 보고서'를 각 제출하는 등 주로 새로운 한글입력방식의 고안 및 사업화에 주력하였다.

다. 원고는 위 타임머커팀에 근무하면서 별지 특허권목록 1. 기재의 '문자입력코드 발생방법 및 장치'(이하 '제1발명'이라 한다)를 발명하고, 1993. 2. 19. 피고회사에 제1발명에 관한 직무발명신고를 하면서 특허받을 권리리를 양도하였으며, 피고회사는 1993. 7. 6. 피고회사 명의로 제1발명에 관한 특허를 출원하여 1996. 3. 13. 특허등록을 마쳤다.

라. 또한 원고는 위 류동기와 함께 위 목록 2. 기재의 '문자입력코드 발생장치 및 방법'(이하 '제2발명'이라 한다)을 발명하고, 1994. 10. 13. 피고회사에 제2발명에 관한 직무발명신고를 하면서 특허받을 권리를 양도하였으며, 피고회사는 1995. 5. 11. 피고회사 명의로 제2발명에 관한 특허를 출원하여 1998. 8. 10. 특허등록을 마쳤다.

마. 피고회사는 1998. 11.경부터 위 발명들의 문자입력방식을 이용한 이동전화단말기를 생산, 판매해 오고 있다.

2. 원고의 청구 및 이에 대한 판단

가. 원고의 청구내용

원고는 ① 위 각 발명은 원고 개인의 자유발명에 해당됨에도 직무발명으로 오인되어 피고 명의로 특허등록이 된 것이라고 주장하면서 제1, 2발명이 직무발명이 아니라는 확인을 구하고, ② 위 발명들을 직무발명으로 오인하고 체결한 각 양도계약이 무효인 이상 정당한 특허권자가 아닌 피고는 위 발명들을 실시하여 얻은 수익을 부당 이득으로서 원고에게 반환할 의무가 있다고 주장하면서, 그 일부로서 10억원을 지급할 것을 구한다.

나. 확인청구 부문의 적법성

피고는, 원고의 위 확인청구는 사실관계의 확인을 구하는 것으로 확인의 소의 대상적격이 없어 부적법하다고 본 안전 항변을 하므로 살펴건대, 원고의 위 확인청구는 원고가 이 사건 소로써 구하고 있는 부당이득반환청구의 전제로 제1, 2발명이 직무 발명이 아니라는 확인을 구하는 취지인바, 이는 범률요건사실 일부의 확인을 구하는 것이어서 무적법하고, 또한 확인의 소에 있어서 확인의 이익은 원고의 명적 지위가 불안, 위험할 때 그 불안, 위험을 제거하는데 있어 확인판결을 받는 것이 가장 유효·적절한 수단인 경우에 인정된다 할 것인데, 아래 다.의 (2)항에서 보는 바와 같이 가사 제1, 2발명이 직무발명이 아니라 하더라도 특허무효심판절차에서 무효심결이 확정되지 아니하는 이상에는 피고회사 명의로 등록된 특허권에 어떠한 효력이 미친다고 볼 수도 없으므로, 위 발명들이 직무발명이 아니라는 확인을 구하는 것은 원고에게 혼란하는 법적 불안, 위험을 해소할 수 있는 유효·적절한 수단이라 할 수 있으니, 결국 원고의 이 사건 소 중 확인청구 부분은 부적법하다.

다. 부당이득반환청구 부분

(1) 원고는 먼저, 제1, 2발명은 직무발명이 아닌 자유발명이므로 그 특허받을 권리 를 피고에게 양도한 위 각 양도계약은 법률행위 목적의 원시적 허능 또는 특허법 제39조 제3항에 의하여 당연 무효이거나 민법 제103조에 위반되어 무효라고 주장한다.

그러므로 과연 제1, 2발명이 자유발명인지에 관하여 보건대, 특허법 제39조 제1항은 직무발명의 개념에 관하여 종업원 등이 그 직무에 관하여 발명한 것이 성질상 사용자 등의 업무범위에 속하고, 그 발명을 하게 된 행위가 종업원 등의 현재 또는 과거의 직무에 속하는 경우 그 발명은 직무발명이라고 규정하고 있다.

앞에서 본 바와 같이 피고회사는 통신기계기구의 제작, 판매를 그 설립목적의 하나로 규정하고 있고, 1989년부터 현재까지 이동전화단말기를 주요 생산품목으로 하 고 있으며, 위 발명들은 이동전화단말기에 이용될 수 있는 문자입력방식에 관한 발명 이므로 피고회사의 업무범위에 속한다 할 것이다. 또한 위 각 발명 당시 원고의 직무 는 정보통신부분의 신상품 개발을 위한 아이디어를 창출하는 것으로 실제 한글입력방 식에 관한 아이디어 계발에 주력한 결과 제1, 2발명에 이르게 되었으므로 위 각 발명 행위는 원고의 직무에 속한다 할 것이다.

따라서 제1, 2발명은 직무발명에 해당한다고 보아야 할 것이므로, 위 발명들이 직무발명이 아님을 전제로 각 양도계약의 효력을 다투는 원고의 주장은 더 나아가 살 펼 것 없이 이유 없다.

(2) 원고는 또한, 제2발명에서는 피고회사가 원고로부터 발명에 관한 권리(승계)를 한 때로부터 4개월이 지나서 특허를 출원하였으므로 이는 발명진흥법 제11조 제1항에 의하여 자유발명으로 간주되고, 같은 조 제2항에 따라 발명자인 원고로부터 통상실시 에 대한 동의를 받지 아니한 이상 피고는 원고에게 통상실시로 상당의 부당이득을 반 환하여야 한다고 주장한다.

살피건대, 발명진흥법 제11조는 사용자 등이 직무발명에 관한 권리를 승계한 후 대통령령이 정하는 기간(같은 법 시행령 제5조는 그 기간을 4개월로 정하고 있다) 내에 출원을 하지 아니하는 경우 또는 서면으로 그 출원을 포기한 경우 당해 발명은 자유발명으로 보고(제1항), 자유발명으로 보는 직무발명에 대하여는 특허법 제39조 제1항의 규정에도 불구하고 당해 발명을 한 종업원 등의 동의를 받지 아니하고는 통상실

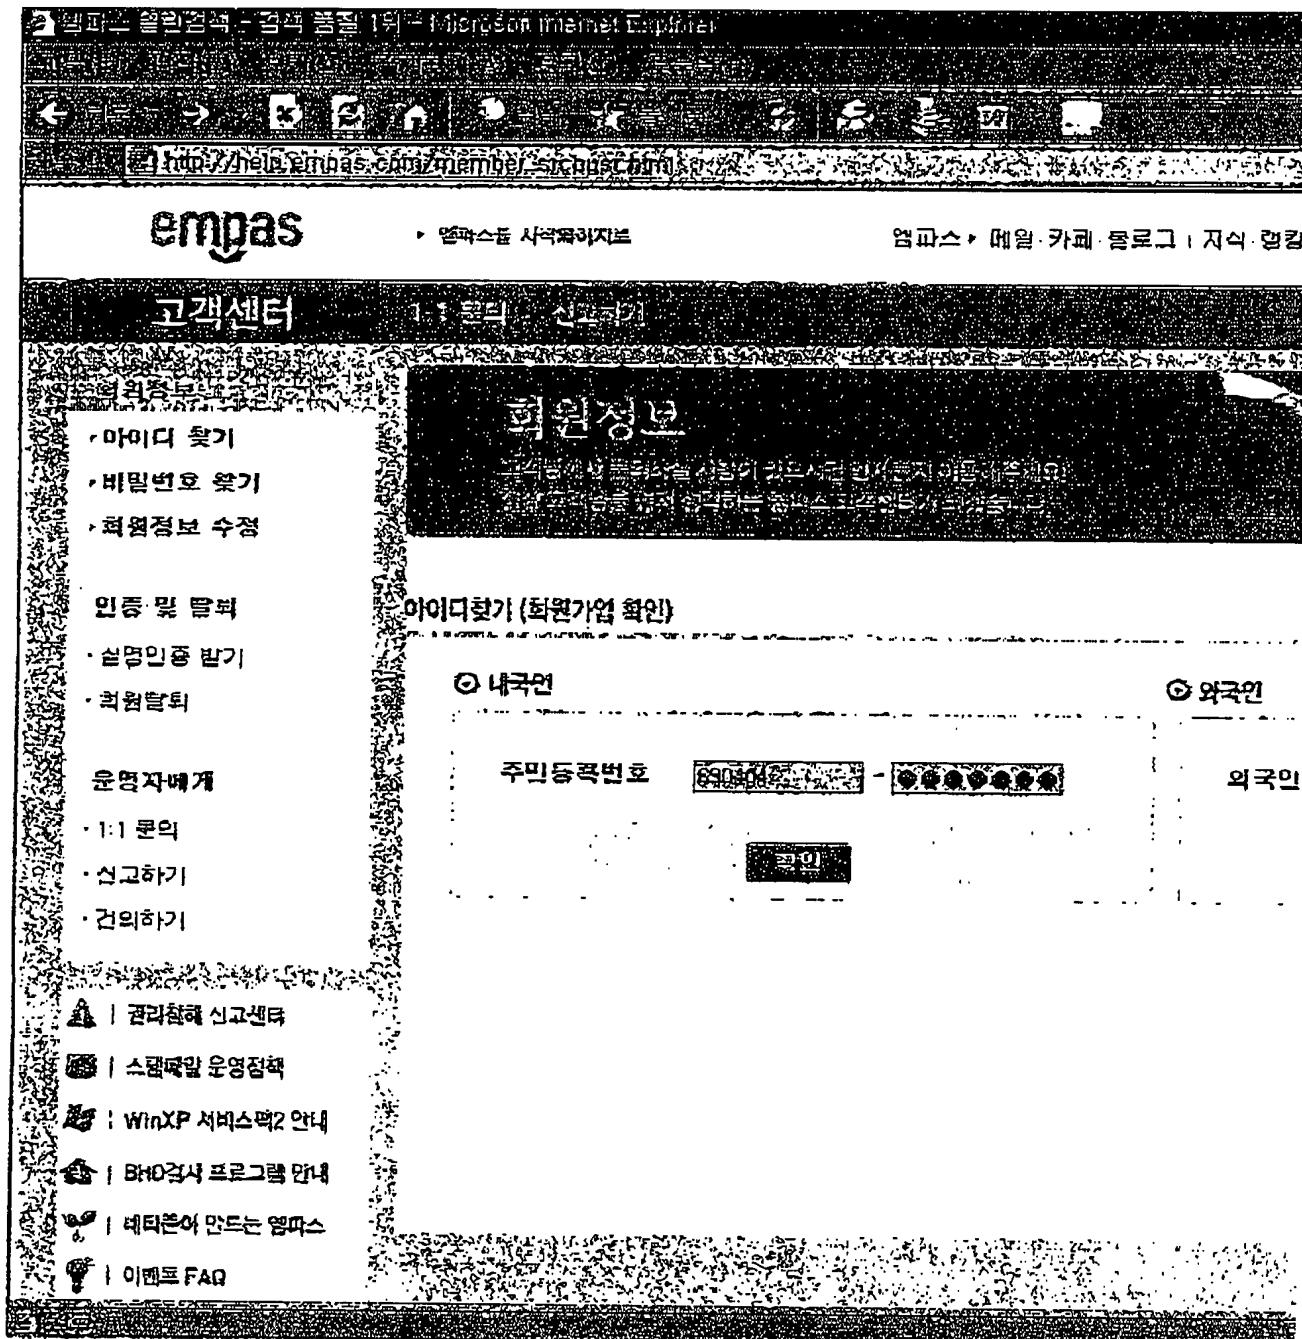

시권을 가질 수 없다(제2항)고 규정하고 있고, 피고회사가 원고로부터 제2발명에 관한 권리를 승계한 1994. 10. 13.로부터 4개월이 경과한 1995. 5. 11.에야 위 발명에 관한 특허를 출원한 사실은 앞에서 본 바와 같다.

그러나 가사 위 법률규정에 의하여 제2발명에 관한 양도계약이 무효가 되어 피고회사가 특허를 받을 권리들 가지지 아니함에도 불구하고 그 명의로 특허등록을 마쳤다 하더라도 원고가 그와 같은 사유를 들어 특허무효심판을 청구함은 별론으로 하고 특허무효심결이 확정되기 전에는 피고 명의로 등록된 특허권의 무효를 주장할 수는 없는 것이므로 피고는 특허권자로서 적법하게 그 발명을 실시할 권리가 있고, 또한 원고가 자기 명의로 특허등록을 받지 아니한 이상 피고회사가 위 발명을 실시함에 있어 원고의 동의를 얻어야 한다고 볼 수도 없으므로, 원고의 위 주장은 이유 없다.

Cc: jykim1 (Joo-Young Kim)
Subject: [To. Mr. Tae Hong Kim] An announcement from Law offices of Kim & Chang (FE251547)
Attachment(s): FE251547-THK-LETTER,INVENTION DISCLOSURE.pdf
FE251547-THK -SIGNATURE DOCUMENTS.pdf
05-507-B-Specification.pdf

To: Mr. Tae Hong Kim
San 136-1, Ami-ri, Bubal-eub, Icheon-si, Gyeonggi-do 467-860, Republic of Korea
Re: U.S. Patent Application No. 10/585,602 (Our Ref. FE251547)

Dear Mr. Kim,

We hope your business is prospering.

We are attorneys for a law firm, Kim & Chang, and contacting you on behalf of our client UTStarcom Korea Limited.

You had assigned your invention as identified on the next page to your former company in 2002, which was conceived when you were working for Hyundai Electronics Industries, Co., Ltd./ Hyundai Syscomm, Inc. under the provisions of the employee's invention compensation policy of the company. Therefore, the right to receive patent for the invention was transferred to the former company. Recently, the right to receive patent was transferred to our client, UTStarcom Korea Limited, hereinafter referred to as "UTSK" from your former company. With respect to this invention, a Korean patent application was filed and its counterpart U.S. patent application has recently been filed with the U.S. Patent and Trademark Office. According to the U.S. Patent law, the inventor is only entitled to be an applicant for a patent application. Therefore, although the right to receive patent has been transferred to our client, UTSK, the U.S. Patent and Trademark Office requires filing of documents as enclosed herewith which must be signed by the inventor.

With regard to the assignment, please be informed that signing the enclosed assignment does not mean that you newly transfer something another to somebody, it merely means confirming that you had already assigned the right to receive patent in 2002. As for

[Translation]

the Declaration, the signing the declaration means that you are declaring that you are the true and sole inventor of this invention.

As explained above, I enclose herewith these signature documents together with the specification as filed with the U.S. Patent and Trademark Office. Please review them and sign and date the marked portions, and return them to us via courier, registered mail or whatever is convenient for you. Any costs to be incurred in this connection are surely responsible to our side. Please send us any receipts for payment in return.

If you have any other questions, please contact the person as below.

발명의 명세서

1. 발명의 명칭

발명의 실질적 내용에 대해 가장 적절히 표현할 수 있는 명칭을 간결하고 명확하게 기재하되
악자는 가급적 피해주시기 바람.

시스템운용상태유지 및 이중화

2. 발명의 상세한 설명

1) 산업상의 이용분야

발명이 무엇에 관한 것이며, 어느 기술분야에 적용되는지를 기재하고, 타 기술 분야에서도
활용이 가능하면 그 기술분야도 기재하시기 바람.

통신시스템의 운용 및 제어기능을 하는 프로세서가 이중으로 존재할 때
이 두 프로세서가 가지고 있는 운용 및 상태정보를 항상 일치시키는 기술 및 구조이며,
운용보존기능이 이중화되어 있는 모든 통신시스템에 이용될 수 있다.

2) 종래기술의 설명 및 그 문제점

*본 발명이 속하는 기술분야에서 본 발명과 연관되는 종래기술이 어떻게 실시되는지
기술적 구성이나 개요를 비교적 상세히 설명하고, 그 문제를 기재하기 바람.
*본 발명과 관련된 참고문헌이나 특허공보가 있으면 문헌명이나 공보번호를 기재하고, 그
자료를 본 명세서에 첨부하시기 바람.

기존에 사용했던 시스템도 운용보전 프로세서 (이하 SCMB)가 구동되는 MAIN CPU BOARD
(이하 ASPA)가 똑같이 두장이었고, 어느정도 이중화 기능이 존재하였다.
그렇지만 그 이중화 방식이 적지 않은 문제점을 가지고 있었다.
예를 들면, 처음 시스템 기동시 두장의 ASPA가 동시에 살아나지 않고, 한장만이 기동된
상태에서 나머지 한장이 기동되게 되면 두 ASPA가 살이한 정보를 가질 수 있다.
이유는 ASPA는 처음 기동될 때 ASPA가 관리하는 ATM CARD 및 SWITCH CARD로
부터 정보메세지를 수신하여 해당 카드들의 관련정보를 구성하고 문제점 발생시 또는
상태변경 필요시 이 관련정보를 변경한다.
그런데, 만약 처음 기동한 ASPA가 수신한 관리 CARD들의 메세지와 두번째 기동한 ASPA의
수신 메세지 갯수가 다를 수 있다. (메세지 유실)
또한, 이 메세지에는 상태변경 및 문제점발생에 대한 정보가 들어있지 않기 때문에
첫번째 ASPA의 기동시간과 두번째 ASPA 기동시간 사이에 어떤 상태정보 변경사항이 발생했을
경우 두 SCMB는 다른 운용 및 상태 정보를 보유하게 된다. 그리고, 이러한 차이를 일치시키기 위해
두 SCMB간에 메세지를 주고 받지만, 그 자체가 ASPA에 높은 부하가 작용하게 되며,
일치시키는 기간동안에도 상태정보변경이 일어날 수 있는 문제점이 있다. <그림 1 참조>

HYUNDAI SYSTEMS

社外秘

3) 돈 발명을 해결하기 위한 본 발명의 기술적 원리

- 돈 발명에서 삼기와 같은 기술적 문제점을 어떻게 해결하고 있는지 그 해결책의 요지만을 기재하고, 그 상세한 설명은 다음항에 기재하기 바람.
- 어떤 효과를 지닌 어떤 기술을 사용하여 어떤 문제점을 해결하였다는 등

ASPA board에 전원이 공급되어 프로세서들이 구동될 때 ASPA board 이중화를 담당하는 'dual'이라는 프로세서가 초기 2장의 ASPA가 동시에 구동될 경우 ftp Protocol로 먼저 기동되는 ASPA board의 DiskOnChip(Flash-Rom)에 저장되어 있는 운용정보 file을 일시에 두 번째로 기동되는 ASPA의 DiskOnChip에 copy를 해준다. 그리고, copy된 ASPA board의 Global Parameter에 형상/운용정보 FileOfCopy되었음을 표시한다. <그림 2 참조>

이후, 기동되는 SCMB는 위 Global Parameter의 표시여부에 따라 DiskOnChip 내용으로 피관리 board들의 운용상태정보를 생성하던지, 예하 Card들이 전송하는 메세지로 운용상태정보를 생성할지를 결정한다. 대부분의 경우 DiskOnChip 내용으로 운용상태정보를 생성하므로 ASPA의 Load를 줄일 수 있고, 일시에 File Copy를 수행하므로 두 ASPA의 정보차이를 줄인다. SCMB의 Load를 줄일 수 있고, 일시에 File Copy를 수행하므로 두 ASPA의 정보차이를 줄인다.

4) 본 발명의 구성 및 그 전반적인 동작설명

- 본 발명은 돈 발명이 속하는 기술분야 또는 연관된 기술분야에 종사하는 기술자라면 누구라도 실시할 수 있을 정도로 상세하고도 정확한 표현으로 기재하시기 바람.

"1장", "2",

초기 ASPA 두장에 모두 전원이 공급되면 우선순위에 따라 ASPA내의 여러 프로세서가 생성된다. 그 구조는 초기 생성되는 프로세서가 다음순위의 프로세서를 생성시키고, 그 프로세서는 그 다음순위의 프로세서를 생성하는 식이다.

이때 초기에 생성되는 'DUAL'이라는 프로세서는 ASPA간 이중화를 담당하며, 상대 ASPA와 통신을 시도 하여 지금의 시스템 상황이 SINGLE(ASPA 1장 기동)인지, DUAL ACTIVE/STANDBY (ASPA 2장 기동)인지지를 파악한다. 만약 현재의 상태가 SINGLE이라면 시스템 최초의 기동사항이므로 현재 DiskOnChip(FLASH ROM)에 저장되어 있는 운용정보가 없거나 의미없는 정보이다. 이럴 경우 SCMB는 관리하는 LineCard(ATM, SWITCH, CLOCK 등)로부터 전송되는 LineCard 내부정보를 이용하여 해당 LineCard 및 운용정보(D-RAM)에 저장하고 해당 운용정보를 사용 가능한 형태로 memory(D-RAM)에 객체구성을 한다.

그리고, 만약 2장의 ASPA가 동시에 기동했을 경우는 DUAL에서 자신의 ASPA board 상태가 DUAL_ACTIVE(2장의 ASPA 중에서 먼저 기동하는 board) 인지 DUAL_STANDBY(2장의 ASPA 중에서 나중에 기동하는 board)인지를 판단한다. 그래서 만약 자신의 board가 DUAL_ACTIVE라면 dual 프로세서는 시스템 운용 프로세서인 SCMB를 기동시킨다. SCMB는 자신이 관리하는 예하 LineCard로부터 수신한 메세지를 이용해 SINGLE 일 때와 마찬가지로 DiskOnChip에 정보를 저장하고 memory에 운용정보 객체를 생성한다. 이와 같이 DUAL_ACTIVE가 정해진 순서에 의해 필요한 작업을 실행하는 동안 DUAL_STANDBY ASPA 보드의 DUAL 프로세서는 잠시 대기한다.

이후 ACTIVE쪽의 일정수준 작업이 진행되면 STANDBY ASPA 쪽의 DUAL 프로세서가 FTP Protocol을 이용하여 ACTIVE쪽의 FTP Server에 접속한 후 DiskOnChip의 경매점 위치에 있는 형상운용정보 File(SystemRegInf)을 복사해서 자신(STANDBY)의 DiskOnChip의 값을 Directory에 오른쪽에 write 한다. 그리고, Dual(STANDBY)은 Global Parameter인 Flag_Run_File_Copy에 TRUE 값인 1을 setting 한다. 그다음 DUAL은 SCMB 프로세서를 기동시킨다.

SCMB는 초기 생성 시 DUAL이 setting한 Global Parameter를 통해 자신이 속한 ASPA 보드가 DUAL_STANDBY인 경우와 Flag_Run_File_Copy Parameter의 setting 값이 1인 경우 ACTIVE ASPA 보드의 현재 운용중인 운용FileOfCopy STANDBY의 DiskOnChip에 복사되었음을 인식하고 Standby ASPA의 DiskOnChip에서 운용정보를 읽어 자신(Standby)의 memory(D-RAM)에 해당 운용정보 객체를 생성한다.

HYUNDAI SYSTEM

社外秘

4) 함에서 계속

그리고, 만약 두장으로 운용되던 ASPA중 한장의 ASPA가 탑장이나 Power-Off가 되었을 시 나머지 한장이 SINGLE이 된다. 그리고 탑장이나 Power-Off된 ASPA가 다시 기동률 시작하면 기존의 SINGLE이었던 ASPA는 DUAL_ACTIVE 가 되고 새로 기동하는 ASPA는 DUAL_STANDBY가 된다.
이후 진행되는 협상 및 운용의 이종화기능은 초기 ASPA가 두장 동시에 실었을 경우의 ACTIVE/STANDBY관계와 동일하다.
즉, STANDBY ASPA의 DUAL 이 ACTIVE로 FTP접속하여 협상을 용File을 특사해오고, Global Parameter인 Flag_Run_File_Copy에 TRUE를 setting한다. SCMB는 DiskOnChip에서 정보를 얻어 Memory에 운용정보객체를 생성한다. < 그림 3 참조 >

5) 본 발명의 다른 실시예

4) 험에 기재된 본 발명의 주요 실시예 이외에 다른 실시예가 있으면 도면을 도시하고, 그 내용을 실시할 수 있을 정도로 구체화 하여 기재.

없음.

6) 본 발명의 효과

본 발명과 종래기술과의 구성 및 동작의 차이에서 오는 효과를 구체적으로 기재하고, 부수적으로 발생되는 이점도 기재하나, 단 기술적인 근거가 없는 악연한 경제적 효과 등을 기재 불필요.

1. 기존 프로세서간 메시지 전송으로 이중화하던 방식대신 FTP를 이용한 File Copy를 구현함으로써 CPU의 부하를 감소시킨다.
2. 이중화하는 기간이 단축되어 거의 양쪽 ASPA의 운용정보가 놀랄치할 가능성이 많이 줄어들었다.
3. 차후 운용보전의 확장시 File구조체만 변경하면 되므로 구현량이 줄어든다.
~~(이중화를 위한 메시지 정의 및 변경 불필요)

ASSIGNMENT

Case No.: 05-507-B

Serial No.: 10/585,602

Inventor: Tae Hong KIM

Date of Execution

Filing Date: July 11, 2006

of Application:

In consideration of One Dollar (\$1.00) and other good and valuable considerations in hand paid, the receipt and sufficiency whereof are hereby acknowledged, the undersigned hereby assigns to:

UTSTARCOM KOREA LIMITED

its successors and assigns, the entire right, title and interest in the invention or improvements of the undersigned disclosed in an application for Letters Patent of the United States, entitled:

APPARATUS AND METHOD FOR DUALIZING AN ASYNCHRONOUS TRANSFER MODE (ATM) ROUTER IN A CDMA 2000 SYSTEM

and identified as:

Case No. 05-507-B

in the offices of MCDONNELL BOEHNEN HULBERT & BERGHOFF LLP and in said application and any and all other applications, both United States and foreign, which the undersigned may file, either solely or jointly with others, on said invention or improvements, and in any and all Letters Patent of the United States and foreign countries, which may be obtained on any of said applications, and in any reissue or extension of such patents, and further assigns to said assignee the priority right provided by the International Convention.

The undersigned hereby authorizes and requests the Commissioner of Patents and Trademarks to issue said Letters Patent to said assignee.

The undersigned hereby authorizes and requests the attorneys of record in said application to insert in this assignment the filing date and serial number of said application when officially known, and the date of execution of the application.

The undersigned warrants himself to be the owner of the entire right, title and interest in said invention or improvements and to have the right to make this assignment, and further warrants that there are no outstanding prior assignments, licenses, or other encumbrances on the interest herein assigned.

For said considerations the undersigned hereby agrees, upon the request and at the expense of said assignee, its successors and assigns, to execute any and all divisional, continuation and substitute applications for said invention or improvements, and any necessary oath, affidavit or declaration relating thereto, and any application for the reissue or extension of any Letters Patent that may be granted upon said application, and any and all applications and other documents for Letters Patent in foreign countries on said invention or improvements, that said assignee, its successors or assigns may deem necessary or expedient, and for the said considerations the undersigned authorizes said assignee to apply for patents for said invention or improvements in its own name in such countries where such procedure is proper and

further agrees, upon the request of said assignee, its successors and assigns, to cooperate to the best of the ability of the undersigned with said assignee, its successors and assigns, in any proceedings or transactions involving such applications or patents, including the preparation and execution of preliminary statements, giving and producing evidence, and performing any and all other acts necessary to obtain, maintain and enforce said Letters Patent, both United States and foreign, and vest all rights therein hereby conveyed in the assignee, its successors and assigns, whereby said Letters Patent will be held and enjoyed by the said assignee, its successors and assigns, to the full end of the term for which said Letters Patent will be granted, as fully and entirely as the same would have been held and enjoyed by the undersigned if this assignment had not been made.

(54) Title: APPARATUS AND METHOD FOR DUALIZING AN ASYNCHRONOUS TRANSFER MODE (ATM) ROUTER IN A CDMA2000 SYSTEM

WO 2005/081461 A1

(57) Abstract: The present invention provides an apparatus and method for dualizing an Asynchronous Transfer Mode (ATM) router in a CDMA2000 system. In a conventional wireless communication system, an ATM router in a Base Station Controller (BSC) has two separate dualized main central processing boards, which are also referred to as ADSL Subscriber Physical board Assembly (ASPA) boards. Each of the ASPA boards includes one operation and maintenance processor, which maintains configuration and operation information. One of the conventional dualized ASPA boards transmits its configuration and operation information to the other, or receives the information from the other, in the form of message. This is in order to maintain the consistency between the information of the dualized ASPA boards, as needed. Such message passing, however, is generally time consuming and may possibly create network overload. According to the invention, the dualized ASPA boards communicate the configuration and operation information with each other using a File Transfer Protocol (FTP), rather than by message passing. Accordingly, communicating the information takes relatively less time, which can considerably reduce the whole system loads and decrease the possibility of data inconsistency between the dualized ASPA boards.

WO 2005/081461

PCT/KR2005/00134

APPARATUS AND METHOD FOR DUALIZING AN ASYNCHRONOUS TRANSFER MODE (ATM) ROUTER IN A CDMA2000 SYSTEM

TECHNICAL FIELD

The present invention generally relates to an apparatus and method for dualizing an Asynchronous Transfer Mode (ATM) router in a CDMA2000 system, and more particularly to an apparatus and method for maintaining consistency between configuration and operation information stored in dualized ADSL Subscriber Physical board Assembly (ASPA) boards, which are incorporated in the ATM router within a base station controller (BSC).

BACKGROUND ART

In a conventional wireless communication system, an ATM router within a BSC has dualized its main central processing unit boards (hereinafter, referred to as "ASPA boards"). This is to ensure the stability of the whole system by harmonizing the information between the dualized ASPA boards. Each ASPA board has an operation and maintenance processor (hereinafter, referred to as "SCMB"). When the ASPA is initially driven, the SCMB within the ASPA board generally receives information messages such as configuration or operation information from an ATM Card and a Switch Card managed by the ASPA. This is in order to build data associated with the respective cards. If an operational state is changed or some error occurs during the operation, the ASPA modifies these data.

With the conventional dualization technique, if the two ASPA boards are not initiated simultaneously during start-up, then each of the ASPA boards may receive and maintain different information messages from the ATM or Switch Card, especially when the operation state of any of the cards is changed during the interval between the initiations. This may result in some problems in maintaining the dualized structure. In order to eliminate such data discrepancy, the two SCMBs in the ASPA boards communicate messages with each other. However, this may cause operational overload in the ASPA boards, as well as another discrepancy due to the state change during the communication.

DISCLOSURE OF THE INVENTION

It is, therefore, an object of the present invention to provide an apparatus and method for maintaining consistency between dualized ASPA boards within an ATM router in a CDMA system. This is accomplished by communicating

WO 2005/081461

PCT/KR2005/000134

configuration and operation information using a file transfer protocol (FTP) instead of a message-passing scheme.

In accordance with one aspect of the invention, there is provided an apparatus for dualizing an Asynchronous Transfer Mode (ATM) router in a CDMA2000 system, the apparatus comprising: a first ADSL Subscriber Physical board Assembly (ASPA) board; a second ASPA board, wherein each of the two ASPA boards comprises a disk-on-chip for storing configuration and operation information; a memory for storing an executable format of an object associated with the configuration and operation information; a dualized processor for transmitting and receiving the configuration and operation information using File Transfer Protocol (FTP); and a operation and maintenance processor for storing the configuration and operation information in the disk-on-chip and generating an object executable on the memory from the information stored in the disk-on-chip.

In accordance with another aspect of the invention, there is provided a method for dualizing an ATM router in a CDMA2000 system, the method comprising the steps of: at a dualized processor, determining in which of three states an ASPA board is, wherein the three states are Single, Active and Standby, respectively; if it is determined that the ASPA board is in the Single or Active state, at the dualized processor, initiating an operation and maintenance processor; at the operation and maintenance processor, receiving messages from managed cards, generating an configuration and operation information therefrom and storing the configuration and operation information in a disk-on-chip; and at the operation and maintenance processor, generating an object executable on a memory from the configuration and operation information and notifying the other ASPA board of the object generation when generating the object is completed, or if it is determined that the ASPA board is in the Standby state, at the dualized processor, waiting until receiving the notification of the generation is completed; at the dualized processor, upon receiving the notification, receiving the configuration and operation information stored in the disk-on-chip of the other ASPA board using a FTP, and storing the information in a disk-on-chip of the ASPA board where the dualized processor is mounted; at the dualized processor, initiating an operation and maintenance processor; and at the operation and maintenance processor, generating an object executable on a memory from the configuration and operation information.

35 BRIEF DESCRIPTION OF DRAWINGS

Fig. 1 is a structural diagram illustrating a dualization configuration of an

WO 2005/0181461

PCT/KR2005/000134

ATM router in a conventional wireless communication system.

Fig. 2 is a structural diagram illustrating a dualization configuration of an ATM router in a CDMA2000 system according to an embodiment of the present invention.

5 Fig. 3 is a flow chart of a method for dualizing an ATM router in CDMA2000 system according to an embodiment of the present invention.

BEST MODE FOR CARRYING OUT THE INVENTION

In the disclosure below, a preferred embodiment of the present invention will be described in detail with reference to the accompanying drawings.

10 Fig. 1 is a structural diagram illustrating a dualization configuration of an ATM router in a conventional wireless communication system. A first ASPA 110 and a second ASPA 120 receive information messages from ATM Card 130, Switch Card 140 and Clock Card 150 respectively to build data associated with the cards. 15 A first SCMB 111 and a second SCMB 112 communicate their own configuration and operation information in the form of message with each other to maintain the dualization structure by harmonizing the information.

Fig. 2 is a structural diagram illustrating a dualization configuration of an ATM router in a CDMA2000 system in accordance with one embodiment of the present invention. In the ATM router within the dualized wireless communication system, an ASPA board has one of three states: Single, Active and Standby. The Single state indicates that the only one of the two ASPA boards has been powered up. When both of the two ASPA boards are powered up, a running board of the two ASPA boards has the Active state and the other board on standby has the Standby state. Each ASPA board includes memories 211 and 221, disk-on-chips 212 and 222, SCMBs 213 and 223, and dualized processors 214 and 224. Disk-on-chips 212 and 222 are non-volatile memories (e.g., flash ROM) for storing the configuration and operation information of the respective ASPA boards. Dualized processors 214 and 224 are in charge of dualizing the ASPA boards. More specifically, in order to maintain the consistency between the information of the dualized boards, a dualized processor embedded in a ASPA board, which is either first powered up or first used as an Active board when the two boards are powered up simultaneously, transmits at one time the configuration and operation information stored on the disk-on-chip to the dualized processor within the other ASPA board using a file transfer protocol (FTP). Then, the receiving processor reproduces the received information into the disk-on-chip and marks the information update with a

WO 2005/081461

PCT/KR2005/000134

global variable. Compared with a message-passing scheme, communicating the information at one time using the FTP is much less time-consuming and thus can considerably reduce the whole system loads. If the global variable indicates that the information has been received and stored into the disk-on-chip using the FTP, SCMB 213 or 223, which is operation and maintenance processor for managing and updating the configuration and operation information in the ASPA board, generates an object in the memory based on the configuration and operation information reproduced at the disk-on-chip. Otherwise, SCMB 213 or 223 builds the configuration and operation information based on the received message from the managed card such as the ATM Card, the Switch Card and the Clock Card, as described below.

Fig. 3 is a flow chart of a method for dualizing an ATM router in CDMA2000 system according to an embodiment of the present invention. When an ASPA is powered up into operation, a plurality of processors within the ASPA are generated and executed sequentially on a priority basis, i.e., a previously generated processor generates another processor with the next priority. First, in blocks S11 and S22, the dualized processors are initially initiated. In blocks S13 and S23, the dualized processor determines in which of the three states the ASPA board remains, the three states being Single, Active and Standby, respectively. If the ASPA board is in the Single state indicating that only one of the two ASPA boards is initiated, there is no valid operation information on the disk-on-chip within the other ASPA. Thus, the ASPA board puts the SCMB into operation (block S14) and directs it to receive and store the internal information from the managed cards, such as the ATM Card, the Switch Card, the Clock Card, at the disk-on-chip to generate an executable object on the memory from the information (block S15). Similarly, if the ASPA board is in the Active state, i.e., the ASPA board is to be first used of the two dualized boards powered up simultaneously, then the ASPA board puts the SCMB into operation (block S14) and generates an object on the memory from the operation message received from the managed cards (block S15). On the other hand, if the ASPA board is in the Standby state, it waits until the other ASPA board in the Active or Single state generates the configuration and operation information (block S24). When the object is completely generated (block S15), the Active or Single ASPA issues a notification of the object generation to the Standby ASPA board. Upon receiving the notification, the dualized processor within the standby ASPA board receives the generated configuration and operation information from the disk-on-chip within the Active or Single ASPA board using the FTP (block S25). The ASPA

WO 2005/081463

PCT/KR2005/000134

board in the Single or Active state employs a FTP server to transmit the configuration and operation information stored at its disk-on-chip by the FTP. The dualized processor in the Standby ASPA board, when receiving the configuration and operation information, writes the information in the disk-on-chip and then initiates the SCMB after updating the relevant global variable to indicate that the received configuration and informational information by the FTP has been written in the disk-on-chip (block S26). In block S27, if the global variable indicates that the received configuration and operation information by the FTP has been written in the disk-on-chip, the SCMB reads the information in the disk-on-chip during the start-up to generate the object associated with the information on the memory (block S27).

With the dualized ASPA boards working, if one of the ASPA boards is unmounted or shut down due to some operational errors such as an interruption of the power supply and a short circuit, the other board gets into the Single state. Further, if the stalled ASPA board gets restarted, the ASPA board in the Single state gets into the Active and the restarted ASPA board into the Standby state. In other words, when the state of the working ASPA boards is changed, a dualized processor within the Standby ASPA board receives the configuration and operation information from the Active ASPA board using the FTP to generate the object, as it does during start-up.

20

INDUSTRIAL APPLICABILITY

As described above, according to the present invention, the dualized ASPA boards communicate the configuration and operation information with each other using the FTP instead of a message-passing scheme. This can considerably reduce the system loads and decrease the possibility of data inconsistency between the dualized ASPA boards. As such, the time needed to harmonize the configuration and operation information can be shortened in inverse proportion to the file transmission rate. Furthermore, when the configuration and operation information needs to be extended, only the data structure thereof has to be modified without additional messages communicated, which may facilitate the maintenance of the whole system.

CLAIMS

1. An apparatus for dualizing an Asynchronous Transfer Mode (ATM) router in a CDMA2000 system, the apparatus comprising:
 - 5 a first ADSL Subscriber Physical board Assembly (ASPA) board; and a second ASPA board; wherein the first ASPA board comprises a first disk-on-chip for storing configuration and operation information; a first memory for storing an executable format of an object associated with the configuration and operation information; a first dualized processor for transmitting the configuration and operation information to the second ASPA board or receiving the configuration and operation information from the second ASPA board using File Transfer Protocol (FTP); and a first operation and maintenance processor for storing the configuration and operation information in the first disk-on-chip and generating an object executable on the memory from the information stored in the first disk-on-chip,
 - 10 and wherein the second ASPA board comprises a second disk-on-chip for storing configuration and operation information; a second memory for storing an executable format of an object associated with the configuration and operation information; a second dualized processor for transmitting the configuration and operation information to the first ASPA board or receiving the configuration and operation information from the first ASPA board using the FTP; and a second operation and maintenance processor for storing the configuration and operation information in the second disk-on-chip and generating an object executable on the memory from the information stored in the second disk-on-chip.
 - 15
2. A method for dualizing an ATM router in a CDMA2000 system, the method comprising the steps of:
 - 25 at a dualized processor, determining in which of three states an ASPA board is, wherein the three states are Single, Active and Standby;
 - 30 if it is determined that the ASPA board is in the Single or Active state,
 - at the dualized processor, initiating an operation and maintenance processor;
 - 35 at the operation and maintenance processor, receiving messages from managed cards, generating an configuration and operation information therefrom and storing the configuration and operation information in a disk-on-chip; and

WO 2005/081461

PCT/KR2005/000134

at the operation and maintenance processor, generating an object executable on a memory from the configuration and operation information and notifying the other ASPA board of the object generation when generating the object is completed;

5 or if it is determined that the ASPA board is in the Standby state,
at the dualized processor, waiting until receiving the notification of the generation completed;

10 at the dualized processor, upon receiving the notification, receiving the configuration and operation information stored in the disk-on-chip of the other ASPA board using a FTP, and storing the information in a disk-on-chip of the ASPA board where the dualized processor is mounted;

15 at the dualized processor, initiating an operation and maintenance processor, and
at the operation and maintenance processor, generating an object executable on a memory from the configuration and operation information.

13 05-439-B	Remote Unit for Adding Frequency Assignments to a Separation-Type Base Transceiver Station	Jae Ick LEE	10/556,267	November 14, 2005	2003-0034799	May 30, 2003	PCT/KR2004/01276	May 28, 2004	
14 05-476-C	Apparatus and Method for Tracking the Position/Object Using a Mobile Communication Network	Choon Geun CHO	10/567,529	February 7, 2006	2003-0066875	September 26, 2003	PCT/KR2004/02466	September 24, 2004	
15 05-496-C	Method of Controlling Power in a CDMA-2000 System	Tae Ik SONG	10/668,234	February 14, 2006	2003-0067736	September 30, 2003	PCT/KR2004/02469	September 24, 2004	
16 05-497-C	Method of Controlling Power in a W-CDMA Mobile Communication System	Dong Keun KIM	10/569,046	February 22, 2006	2003-0067737	September 30, 2003	PCT/KR2004/02470	September 24, 2004	

SCHEDULE A						
MBHB Reference No.	Title	Inventor(s)	U.S. Application No.	U.S. Filing Date	Korean Application No.	Filing Date (Korean Application)
						Filing Date PCT National Phase
17 05-498-C	Method of Controlling Data Rate for a Forward Data Service in a CDMA 2000-1X System	Jung Han LEE	10/569,041	February 22, 2006	2003-006773B	September 30, 2003 PCT/KR2004/02471 September 24, 2004
18 05-500-B	ATM Switched Router for Transmitting IP Packet Data	Jung Hee PARK	10/585,586	July 11, 2006	2004-0002981	January 15, 2004 PCT/KR2005/00133 January 14, 2005
19 05-507-B	Apparatus and Method for Dualizing an Asynchronous Transfer Mode (ATM) Router in a CDMA2000 System	Tae Hong KIM	10/585,602	July 11, 2006	2004-0002973	January 15, 2004 PCT/KR2005/00134 January 14, 2005
20 05-509-B	Method for Correcting Time Data in a Network Management Application Using a SNMP	Sang Dae PARK	10/586,086	July 13, 2006	2004-0002979	January 15, 2004 PCT/KR2005/00138 January 14, 2005
21 05-611-B	Apparatus and Method for Sensing Failures of Application Programs in a CDMA System	Ki Sung LYU	10/586,289	July 13, 2006	2004-0002980	January 15, 2004 PCT/KR2005/00139 January 14, 2005
22 05-617-B	Automatic Update System and Method for Using a META MIB	Young Jin KIM	10/586,087	July 13, 2006	2004-0002982	January 15, 2004 PCT/KR2005/00140 January 14, 2005

SCHEDULE A

MBHB Reference No.	Title	Inventor(s)	U.S. Application No.	U.S. Filing Date	Korean Application No.	Filing Date (Korean Application)	PCT Application No.	Filing Date PCT National Phase
23 05-518-B	Structure of a Management Information Base Communicated Between a Network Management System and an Agent of a Network Element	Kwang Seok KANG	10/585,838	July 12, 2006	2004-0002983	January 15, 2004	PCT/KR2005/00141	January 14, 2005
24 05-595-B	Method of Distributing Network Traffic in a Mobile Communication System	Hyun Young SHIN	10/556,924	November 14, 2005	2003-0035283	June 2, 2003	PCT/KR2004/01310	June 2, 2004
25 05-597-B	System and Method for Tracking Position of a Mobile Unit Using Beacons in a Mobile Communications System	June Man KIM	10/560,664	December 13, 2005	2003-0050916	July 24, 2003	PCT/KR2004/01851	July 23, 2004
26 05-615-B	Method for Call Completion Service	Soo Gon CHUN	10/556,274	November 14, 2005	2003-0034808	May 30, 2003	PCT/KR2004/01274	May 28, 2004
27 05-616-B	Method for Automatically Setting a Frequency of a Base Station in a CDMA-2000 System	Ju Hyun BAN; Sang Won SON	10/561,351	December 18, 2005	2003-0051154	July 24, 2003	PCT/KR2004/01854	July 23, 2004
